Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 25 June 2001.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-5, 11-26, and 32-42 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Prohs et al. (Prohs; US 5,267,305; cited and applied for the first time).

The entire patent to Prohs is directed to the claimed system and method for undetected provision of an auxiliary service during a telephone conversation between at least two participants over a communications network. Prohs plainly teaches the claimed handset and the service processor. Refer specifically to the Abstract; column 2, line 30 – line 65; and column 64, line 1 – column 69, last line.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

Art Unit: 2642

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

5. Claims 6-9 and 27-30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Prohs et al., as applied above, in view of Wrede et al. (Wrede; US 5,937,040; cited and applied for the first time).

Prohs differs from claims 6-9 and 27-30 with respect to the separate channeling of voice and signaling. However, ISDN is well established in the current state of the telephony art to provide separate channels for respective voice and signaling where the signaling is transparent to the caller as taught by Wrede at column 4, line 5. Therefore, it would have been an obvious matter of design choice, even to one of ordinary skill in the art at the time of the invention, to provide services by modifying the transparent signaling concept in the PSTN of Prohs into an ISDN environment as motivated by Wrede.

6. Claims 10 and 31 are rejected under 35 U.S.C. 103(a) as being unpatentable over Prohs in view of Wrede as applied to claims 6-9 and 27-30 above, and further in view of Regnier (US 6,345,047; cited and applied for the first time).

Prohs in view of Wrede does not teach the second channel comprising the Internet. However, Regnier plainly teaches such a feature (see column 17, lines 19 – 46). Therefore, it would have been obvious even to one of ordinary skill in the art at the time of the invention to provide the Internet on the second channel of Prohs in view of

Wrede as taught by Prohs. Transparent Internet access is a strong motivation in the current state of the art.
